

## Schindler 6000 Plus

A RePlace solution for your existing elevator

With a Schindler  
6000  
Plus,

the sky's  
the limit

With the latest technologies, high-end finishes, larger capacities and flexibility for custom design options – **Schindler 6000 Plus delivers a first-class ride.** Our Swiss-engineered materials and components have been developed to deliver superior performance and energy efficiency in existing buildings. The Schindler 6000 Plus gives your building a **greener outlook on life.**

# Schindler RePlace

## Modernization solutions to keep passengers moving

With almost 150 years designing, manufacturing, and installing elevators, we understand how to transport people and loads safely and reliably. Our experience helps us understand and address the particular requirements and the unique challenges that an elevator modernization presents. With Schindler, enjoy the hassle-free and efficient modernization of your existing equipment.

### Swiss-precision engineering

Like any technical product, elevators are also subject to a life cycle. Elevator equipment and components will eventually wear down, requiring upgrades to maintain the performance and reliability of the system. So we're using our Swiss-precision engineering and globally renowned expertise to provide you with the best elevator modernization solutions.

### Solutions for every building

Our Schindler 6000 Plus is just one of our RePlace elevator solutions.

We have several Schindler RePlace options available – the Schindler 1000 Plus, Schindler 3000 Plus, Schindler 5000 Plus, or Schindler 6000 Plus – to meet the requirements of your specific building and the existing equipment.

## New elevator, existing hoistway

A Schindler RePlace modernization introduces a completely new elevator into the existing hoistway space.

By fully replacing your existing system, your building benefits from the latest safety standards and leading energy-efficient technologies, allowing you to reduce your carbon footprint and energy costs. And, passengers benefit from a new, fresh elevator.

## Enjoy peace of mind

A Schindler RePlace not only increases the reliability and performance of your existing elevator, it also adds value to your existing investment. Maintenance-friendly components and the replacement of obsolete parts reduce the likelihood of equipment downtime. Let us give you peace of mind with our Schindler RePlace elevators.

From design and installation, through to service and modernization, our professionals are there throughout the life cycle of your elevator.

## Repair or modernization? Giving your elevator new life

### Assessing your elevator

In contrast to a repair, which offers a 1:1 replacement of components, a modernization upgrades components and brings your elevator to a higher standard. The latest regulations, introduced to make your elevator as safe as possible, can be easily met with a Schindler RePlace elevator.

After commissioning, regular maintenance, and repairs, a Schindler modernization will help ensure that your elevators continue to perform optimally for years to come.

### Minimize unpredictability

A Schindler RePlace modernization addresses the unreliability and unpredictability associated with older installations, so passengers can enjoy a smooth and uninterrupted journey to their destination. Replacing an obsolete system safeguards against unnecessary downtime due to spare part unavailability – maximizing uptime in the future.

For equipment that is over 30 years old, a Schindler RePlace elevator – the Schindler 1000 Plus, Schindler 3000 Plus, Schindler 5000 Plus, or Schindler 6000 Plus – should be considered to maintain the availability of spare parts, improve equipment performance, and preemptively upgrade components that are reaching their end of life.

Keep passengers moving smoothly, efficiently, and comfortably with a Schindler RePlace modernization

# Schindler 6000 Plus

## Unique, powerful, and efficient

Schindler 6000 Plus combines high-rise performance with maximum flexibility to help you modernize your building – for any rise up to 150 meters, speed up to 3.0 m/s, and groups up to eight cars. This flexibility also extends to the design, dimensions, configurations, and application range – even addressing the needs of demanding public transit, mixed-use and commercial projects. This premium product offers high-end and robust design solutions to meet the needs of the most ambitious renovation projects around the world.

Schindler 6000 Plus integrates the latest technology, a flexible, durable structure, and the highest quality materials to deliver faster handling times for higher passenger volumes – all with optimum ride quality and greater reliability.

### Key figures

<b>Capacity</b>	Max 2600 kg
<b>Travel height</b>	Max 150 m
<b>Stops</b>	Max 50 stops, with a maximum of 80 openings
<b>Speed</b>	Max 3.0 m/s
<b>Machine room</b>	Machine-room, mini-machine room or machine-room-less
<b>Drive system</b>	frequency controlled, eco-friendly regenerative drive technology
<b>Group size</b>	Up to 8 cars, unlimited with Schindler PORT technology
<b>Entrances</b>	One- or two-sided
<b>Energy efficiency classification</b>	Class A, according to ISO 25745-2*

\*The classification always refers to a specific customer configuration. Usage pattern, load capacity, customer specific options and site conditions influence the final rating.

### First-class ride experience

Superior ride quality and performance. The Schindler 6000 Plus is built around components of the highest quality.

### Future-ready

A modernization introduces the latest digital innovations and new technologies to further support the management and maintenance of your equipment into the future.

### Efficiency and ecology

Upgraded components and the latest sustainable technologies help to reduce the energy consumption of your equipment.

### Flexible integration

The Schindler 6000 can be adjusted to fit the existing hoistway space. Options, such as a reduced headroom and flexible door sizes, minimize the impact to the building.

# Future-ready

## Schindler elevators designed for next-generation technologies

Our Schindler RePlace elevators allow your passengers not only to enjoy noticeably smoother and quieter operation, but also another level of passenger experience thanks to digitally enhanced mobility. A modernization introduces leading technologies, such as intelligent electronic diagnostics, to further support the management and maintenance of your equipment into the future.

### Innovations in installation

Schindler's new **INEX (Installation Excellence)** method not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on-site.

### Smart operation – switching to digital

All our elevators are fully enabled for **Schindler Ahead** – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

- **Maximize uptime with Ahead Remote Monitoring**  
With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimize or even avoid downtime.
- **Real-time insights with Ahead ActionBoard**  
Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

### User experience on a next level

Infotainment hub with **Ahead SmartMirror** and **AdScreen**, or transform user-elevator interaction into a unique, visual experience with the **Linea 800 SmartTouch** interactive fixtures.

Get real-time insights with Ahead ActionBoard.

Turn the ride into a multimedia experience for passengers with Schindler SmartMirror.

With valuable and predictive information available in real-time, preventive actions can be taken more quickly.

# Elevating sustainability

## Excellent ecological performance

We're constantly working on reducing the environmental impact of our products and services across their entire life cycle. The Schindler 6000 Plus passenger elevator is a uniquely designed product whose parts are perfectly adjusted to fit within the existing hoistway, saving both space and energy.

### Class A energy-efficiency rating

Improving the energy efficiency of older buildings is vital to the development of more sustainable cities. Modernizing your existing elevator help to reduce the environmental impact of this equipment in the buildings they serve. Regenerative drive, LED lighting and stand-by mode while parked, are standard eco-friendly features in all Schindler 6000 Plus elevators, aiming to achieve the highest energy-efficiency rating class A, according to ISO 25745-2\*.

### Environmental Product Declarations (EPD)

To provide an insight into the ecological performance of our elevators throughout their life, we provide Environmental Product Declarations (EPD). We've registered EPDs at the "International EPD® System" for all major elevator product lines. This is an important step in the assessment of the environmental performance of our products and underlines our continuous efforts toward sustainable solutions.

Energy-efficiency rating  
class A, according to  
ISO 25745-2\*

\*The classification always refers to a specific customer configuration.  
Usage pattern, load capacity, customer specific options and site  
conditions influence the final rating.

# Efficiency and ecology

## Architecturally and environmentally friendly

Our Schindler 6000 Plus is designed to combine dimensions, technologies, and options flexibly to blend into and complement your existing building. Make your building more efficient and optimize space through excellent shaft utilization with our scalable car configurations, which minimize the need for additional building works.

### 1 Flexible layout solutions

- The Schindler 6000 Plus offers flexible configurations depending on your needs. Select from a space-saving machine-room-less (MRL) design, a mini-machine-room, or machine-room option
- The flexible positioning of the counterweight provides more options for perfect space utilization, maximized rentable space and lower building costs

### 2 Energy-efficient machine

- Lubrication-free, gearless machine supports a smooth ride quality
- Permanent magnet technology offers higher energy efficiency
- Stable start without high peak current, quickly reaches a low energy consumption level

### 3 Regenerative inverter as standard

- Minimum heat dissipation due to energy recuperation. This minimizes energy consumption and reduces the cooling requirement in the machine room by up to 50%
- Return of regenerated energy to mains power during overhauling mode
- Minimal reactive power thanks to the use of a Power Factor 1 converter

### 4 Future-ready controller

- Reduced stand-by power improves energy efficiency
- Halogen-free cabling and wiring, available as an option
- Precision stopping accuracy for easy access
- Digitally-enabled for remote maintenance and commissioning to meet the highest quality standards

### 5 Modular, scalable system

- Scalable car sizing in any direction, in 50 mm increments
- Car heights up to 3200 mm, scalable in 100mm increments
- Doors can be sized and positioned with millimeter accuracy to reduce the need for costly and timely rework to the building.
- The door width is adjustable in 100 mm increments from 800 to 1800 mm and door height up to 3000 mm, with a choice of telescopic (T2) or center-opening doors (C2, C4) and single or double (through-loading)

### 6 Hoistway and suspension technology

- STM technology enables a smaller machine compared to conventional steel rope applications
- Compared to steel ropes, the STM is oil-free and does not require regular lubrication
- Roller guide shoes, as an option, improve the ride quality and the efficiency of the elevator, especially while traveling at higher speeds
- A reduced headroom, as an option, ensures the system fits within the available space

## The sound of moderate rainfall

Thanks to our high-quality technology and installation methodologies, Schindler elevators generate minimal noise. Most of the noise created by our elevators does not exceed 50 – 60 dB (A).\*

\*For the evaluation methodology, we comply with ISO 18738 standards. However, many factors influence the amount of noise and vibration generated by an elevator. See our Ride Quality brochure to learn more.

# Schindler PORT Technology

## Best-in-class traffic management

Optimize the way people move around your building. Improve efficiency, reduce energy consumption, and create more satisfying experiences with Schindler PORT – a holistic solution to building transit management.

A Schindler PORT upgrade can be implemented as the first step of a more comprehensive modernization to achieve smart mobility in a minimum amount of time. Customers will experience an immediate improvement in traffic flow, even if one car is out of service for the modernization.

### Personalized experiences

Customize user journeys based on individual needs and access rights. User-friendly, high-resolution interfaces and touchless operations enhance the experience for passengers.

### Highly efficient people flow

Especially suited to large elevator groups or straight-line configurations in heavy-traffic commercial buildings, Schindler PORT can increase handling capacity by up to 25% and reduce waiting times by up to 20%.

### Secure access

Pre-program and control elevator, floor, and room access rights for tenants and visitors from a central location. Lobby speed gates take identification and access control to new heights of efficiency.

Learn more about  
PORT Technology

[www.schindler.com/port](http://www.schindler.com/port)

## myPORT

Schindler myPORT is the comprehensive building transit application that puts the power of Schindler PORT Technology into the hands of residents and tenants – in one smartphone app.

Schindler myPORT provides appropriate levels of building access from main entrances and parking garages to offices and apartment doors. For visitors, it's hospitality at its best with a digital invitation giving simple entry and guidance. Occupants can communicate directly with visitors via Schindler myPORT's video intercom system.

## Sustainable operations

Elevator energy consumption can be reduced by up to 40%\* with Schindler PORT ECO Mode. Schindler PORT can also help reduce the energy usage per capita by up to 20%\* - making the solution a smart one for your building and the environment.

\*Calculations are in comparison to prior Schindler PORT Technology software releases and refer to a specific customer configuration. Usage patterns, load capacity, customer specific options and site conditions may influence the final calculations.

# Schindler PORT Overlay

## A seamless and hassle-free modernization

### Schindler PORT

Schindler PORT technology – our destination dispatch system – can be installed in place of conventional fixtures on each landing to optimize the performance of an elevator group.

Schindler PORT provides a wide range of destination control and access terminals for visitor management, parking, doors, offices and residences. Combine terminals to produce an aesthetic and functional solution for any building.

# Installation excellence

## Working with you every step of the way

### Transparent fulfillment process

We partner with you to find the best mobility solution for your facility. By checking the health of your existing equipment, we can determine what solution and components are the best fit for your installation.

To ensure a smooth installation process, we'll meet with you a few weeks before the modernization starts to discuss the final program of work. We'll also clarify storage and access points, and coordinate our activities with any subcontractors on-site so you can enjoy a professional and hassle-free process from ordering to handover.

### Efficient installation and future maintenance

Our global competencies and expertise make it sure to minimize building adaptations and optimize the installation process when replacing your elevator, setting new standards in the field. In fact, installing our replacement elevators requires up to 40% less time than a conventional replacement. That means that residents can look forward to minimum disturbance and downtime.

After a Schindler RePlace modernization, your equipment becomes easier to service and troubleshoot. The newly connected elevators enable 24/7 intelligent auto callback service and maintenance. This can reduce downtime by up to 34%\*.

\*Compared to non-connected units.

# Schindler modernization

## Various solutions to meet your needs

Are you interested in replacing your elevator with a completely new system? Or, maybe you would like to upgrade individual components? Either way, we have the solution that's right for you.

We have developed various modernization solutions to target the differing age, technical needs, and usage of elevators in operation today. A Schindler RePair addresses individual components on an as needed basis. A Schindler ReStore targets the electrical system to enable the latest technologies. Alternatively, a ReNew upgrades the critical electrical, and mechanical components, such as the machine, to deliver a smooth, safe and energy-efficient ride. While, a Schindler RePlace introduces a brand new elevator into your existing hoistway.

If you would like to learn more about Schindler's modernization solutions, visit: [www.schindler.nl](http://www.schindler.nl)
